

EDUSYNC ENTERPRISE AI

BUDGET PROPOSAL 2026

The Future of Institutional Intelligence

Project: EduSync 4.0 (The Ultimate Node)

Target Capability: 1,50,000 Users

Date: March 10, 2026

Investment Budget & Strategic Proposal 2026

Project Name: EduSync 4.0 (Enterprise AI Node)

Company/Team Name: Inixa AI Development Team

Contact Info: Keerthan | Lead Developer

Date: March 10, 2026

1. Executive Summary

Main Goal:

To establish a Tier-3 private AI infrastructure that allows institutions to host, train, and deploy large-scale LLMs locally, ensuring 100% data sovereignty and zero recurring cloud costs.

Problem:

Cloud AI (OpenAI/Google) is expensive at scale (Rs. 3.5L+/month for 10k users), lacks privacy for institutional data, and suffers from internet latency.

Solution:

A high-performance "Ultimate AI Node" featuring **4x NVIDIA RTX 5090 (128GB VRAM)**. This local powerhouse serves up to **1,50,000 users** with sub-second response times using fine-tuned "Master-Worker" swarms.

Financial Highlight:

- **Total Capex:** Rs. 35,00,000 (One-time investment).
- **Monthly Net Profit:** Rs. 23,50,000 (at 1 Lakh users).
- **Payback Period:** < 2 Months post-scale.

2. Project Overview & Milestones

The project is divided into three strategic phases to ensure stability and rapid user acquisition.

Phase	Milestone	Focus	Timeline
Phase 1	Infrastructure Build	Hardware assembly, Liquid cooling, & OS installation.	Week 1-2
Phase 2	AI Optimization	Fine-tuning Gemma 3 models & Swarm orchestration.	Week 3-4
Phase 3	Beta Campus Launch	Onboarding first 10,000 students & GTM push.	Month 2
Phase 4	Full Scale Operations	Reaching 1,00,000+ users via institutional B2B sales.	Month 6

3. Detailed Budget Breakdown

This budget represents a complete "Mini Data Center" setup for the 4x RTX 5090 cluster.

A. Operational & Technology Infrastructure

B. Human Resources & Implementation

Component	Specification	Cost (INR)
AI Super-Node	4x RTX 5090 + TR 7980X + 512GB RAM	Rs. 24,15,000

Facility Setup	10kVA UPS, 3-Ton AC, 63A Wiring	Rs. 4,50,000
Liquid Cooling	Custom Industrial Loop (4-GPU Blocks)	Rs. 1,50,000
Thermal Rack	12U Sound-Proof Server Chassis	Rs. 1,50,000
Subtotal (Hardware)	Rs. 31,65,000	

- Development & Deployment Labor: Rs. 1,50,000.

****C. Marketing & GTM (Initial 6 Months)****

- B2B Direct Sales & Digital GTM: Rs. 1,00,000.

****D. Contingency Fund (Unexpected Expenses)****

- Reserve (5.4% of Hardware): Rs. 1,70,000 (For component price fluctuations/spares).

****Total Project Budget: ■35,85,000 (Approx. 35 Lakhs)****

4. Revenue Model

We utilize a high-volume, low-margin subscription model designed for mass adoption across educational campuses.

Model: Premium Plan @ Rs. 25 / User / Month

****Profit Projections (1-Year Outlook)****

Scale (Total Users)	Monthly Revenue	Monthly OPEX	Net Monthly Profit
10,000 Users	Rs. 2,50,000	Rs. 1,50,000	Rs. 1,00,000

50,000 Users	Rs. 12,50,000	Rs. 1,50,000	Rs. 11,00,000
1,00,000 Users	Rs. 25,00,000	Rs. 1,50,000	Rs. 23,50,000
Annual (at 1L)	Rs. 3,00,00,000	Rs. 18,00,000	Rs. 2,82,00,000

5. Strategic Advantage: Why EduSync?

1. **Zero API Costs:** No token-based recurring payments to OpenAI/Google.
2. **100% Privacy:** Institutional data never leaves the campus.
3. **Future-Proof:** The **128GB GDDR7 VRAM** cluster is capable of running the next generation of AI models (Gemma 3/4) for the next 5 years.
4. **Local Latency:** Instant response for thousands of students simultaneously.
